DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species I and Species C in Paper No. 8 is acknowledged. Claim 25 is withdrawn from consideration because it is drawn to Fig. 6.

Please provide reference numerals to all the claimed limitations as well as support in the disclosure for better clarity. Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 13-15, 20-21, 23-14 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over E. A. Hagel (US 1,742,312) in view of McCooey (US 6,076,246).

Hagel discloses in Fig. 1 a plug-in connection element with an opening and electrical connections therein and arranging, forcing and sealing the elastically deformable closure part (14) under the pressure of filler (13). Element 14 has two opposing flexible lip parts with an opening therebetween and a collar. Both 14 and 13 have tapers.

Hagel fails to disclose providing foam pressure.

Art Unit: 3729

McCooley discloses providing foam pressure thereby sealing to protect from the environment.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Hagel by providing foam pressure, as taught by McCooley, for the purpose of sealing to protect from the environment.

Please provide reference numerals to all the claimed limitations as well as support in the disclosure for better clarity. Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.

Response to Arguments

4. Applicant's arguments with respect to claim as recited above have been considered but are moot in view of the new ground(s) of rejection.

Interviews After Final

5. Applicant note that an interview after a final rejection will not be granted unless the intended purpose and content of the interview is presented briefly, in writing (the agenda of the interview must be in writing) to clarify issues for appeal requiring only nominal further consideration. Interviews merely to restate arguments of record or to discuss new limitations will be denied. See MPEP 714.13 and 713.09.

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
